Bulletin No. 08-06
November 24, 2006

To: ITW Ransburg and ITW Automotive Finishing Distributors
Subject: Cable Boot (P/N A11745-00) for Vector & REA Low Voltage Cables

An improvement has been made on the low voltage cable for the Vector and REA handguns. Handguns with cables P/N 79338-00, 78084-XX, and 78085-XX will now have a boot over the end of the cable that connects to the applicator to protect the metal connector and strain relief.

These boots will be placed on all new outgoing P/N 79338-00, 78084-XX and 78085-XX cables. The new cable boot (P/N A11745-00-K5) can also be ordered for cables already in use.

The figure below shows how the boot fits on the applicator end of the cable. Please note that the smaller tapered end, fits around the cable and the larger round end fits on the applicator end hex-coupling nut.
