

Service Bulletin

Bulletin No. 10-07
October 31, 2007

To: ITW Ransburg and ITW Automotive Finishing Distributors
Subject: RMA-303/MMA-303 Air Bearing Spindle (P/N A11081) - Green Color Anodize Body

New Air Bearing Spindles (P/N A11081) will be colored with green and black anodizing. The anodizing of parts is a protective finish and the change in color will have no affect on performance.

To eliminate the inconsistency of green color in the component parts, the main forward housing will be green and the rear plates will be black.
