**Subject: E-Con Flush Box and Interface with RCS 2**

Reducer fittings have been added to the E-Con Flush Box (22-1486) and the Remote Operator Panel for the RCS-2 (A11095) to allow direct interface with the RCS-2. Currently, the RCS-2 uses 5/32" tubing while the E-Con Flush Box uses 3/16" tubing and the Remote Operator Panel uses 1/4" tubing. Now all three pieces of equipment can directly accept 5/32" tubing. 5/32" T x 3/16" T (79954) reducer fittings were added to the E-Con Flush Box and 5/32" T x 1/4" T (41-FTP-1015) reducer fittings were added to the Remote Operator Panel.
